

Xeta4-RED Series 400 MHz

9 kbps – 44 kbps

Licensed Software Defined Radio for European ETSI / RED Applications

The **Xeta4** is a licensed dual band 406 – 470 MHz¹ software defined radio that features **Dynamic Modulation**, flexible configuration options and multi-layer Ethernet capabilities including VLAN and Routing.

For ETSI / RED operation, this Dynamic Modulation provides data rates from 9 – 44 kbps in the licensed 406 – 430 / 450 – 470 MHz¹ bands with 12.5 kHz channel size and power output from 50 – 8000 mW (17 – 39 dBm). The Xeta4 selectively and dynamically switches between chosen modulations based on link quality and environmental noise. A 410 - 470 MHz contiguous frequency band is available as an option.

With built-in support for **MultiSpeed MultiPoint™** the **Xeta4** enables both high and low speed remotes to operate on the same network with a single Access Point. This new capability allows for unparalleled flexibility in network design where the network isn't compromised by the longest or weakest link.

Based on its patent pending **Dual Decode Digital Architecture™**, XetaWave's technology platform offers performance second to none in the commercial market today.

¹ Also available as single band 410 – 470 MHz; please specify when ordering.

Technology Differentiators

High Speed 9 kbps – 44 kbps over-the-air data rates.

Dual or Single Band 406 – 430 / 450 – 470 MHz or 410 – 470 MHz with ETSI / RED compliance support a wide range of licensed applications in a single radio. 410 – 470 MHz is available as an option.

Dual Radio Support for optional 2nd RF Module (of any Xeta Series) in a single enclosure provides enhanced repeater functionality, higher throughput rates and multi-band/multi-frequency operations.

Link Adaptation Dynamic data rate automatically adapts communication parameters to achieve optimal link performance.

Multi-Speed Multi-Point Unique to XetaWave, a *single* radio can have multi-logical data channels with different speeds, providing configuration and installation flexibility where long range or high speed can be prioritized.

Ethernet Switch The Xeta4 acts like a switch, making efficient use of RF bandwidth when compared to other "bridge" products. Two independent Ethernet ports and up to two RF Modules, each with full VLAN support, allow multiple logical networks to exist within the same physical system.

IP Routing Layer 3 Routing provide Ethernet traffic management for slower narrowband links, making the most efficient use of RF link bandwidth when passing Ethernet traffic.

Seamless Serial Provides the most efficient use of RF bandwidth when passing Serial messages to groups of devices, while also allowing Ethernet traffic to remain functional; *the hybrid approach*.

Serial Services also enable hybrid networks utilizing both Ethernet and legacy Serial devices through TCP Terminal Server, TCP Terminal Client, UDP Terminal, and Modbus RTU Server capabilities.

IO Services Enables integration of Digital / Analog inputs & outputs with control and monitoring via Modbus TCP with ASCII/RTU support.

Configuration Management with text-based configuration files provides users with the ability to manage radio configurations more efficiently.

Onboard Diagnostics Built-in diagnostic support with tools such as RF Ping, RF Throughput, and Neighbor List in combination with SNMP.

8 Watts Adjustable power output from 50 mW – 8 W (17 – 39 dBm)

Industry Applications

Oil & Gas

- Bandwidth for expanding IP-based control systems.
- Unified serial and IP/Ethernet infrastructure.
- Licensed product where 406 – 430 / 450 – 470 MHz licenses are available (410 – 470 MHz is an option).
- Custom channel sizes to meet various global frequency deployment criteria.

Energy

- 100% testing over full -40°C to +75°C operating range ensures reliable communications across the harshest environments. *Contact XetaWave for lower temperature operation.*

Industrial Controls

- Optional I/O allows seamless integration of ModBus RTU, ModBus TCP and DNP3* protocols into a unified wireless network.

** Xeta4 seamlessly passes DNP3 only.*

Electric Power

- Distribution Automation
- Substation Automation
- SCADA
- Grid Sensors
- Voltage Optimization

Water & Wastewater

- Higher data rates allows more frequent polling.
- Standard AES 256 bit encryption support secures critical communications channels from unauthorized use and interception.

Technical Specifications – European ETSI/RED Applications

Transmitter

Frequency Range	-	Dual Band: 406 – 430 / 450 – 470 MHz or Single Band: 410 – 470 MHz <i>(specify when ordering)</i>
Output Power	-	50 – 8000 mW (17 – 39 dBm)
Modulations	-	BPSK, MSK, QPSK, 8PSK, 16QAM, 32QAM
RF Data Rate	-	10 kbps – 44 kbps
Occupied Bandwidth	-	12.5 kHz, 25 kHz (50 kHz and other custom channel sizes available to meet local regulations)
Frequency Stability	-	1.0 ppm
Duty Cycle	-	Continuous
Output Impedance	-	50 Ohms
Range	-	70+ miles

Receiver

Sensitivity	-	12.5 kHz	25 kHz
64 byte packets, 10% packet error rate	BPSK	-113 @ 9 kbps	
	MSK	-108 @ 10 kbps	-106 @ 19 kbps
	QPSK	-110 @ 17 kbps	-103 @ 29 kbps
	8PSK	-104 @ 26 kbps	-98 @ 44 kbps
	16QAM	-100 @ 35 kbps	-94 @ 59 kbps
	32QAM	-97 @ 44 kbps	-90 @ 76 kbps
Selectivity	-	43dB (ETSI 32QAM EN300113 V2.2.1 Test Method)	
Intermodulation Rejection	-	53dB (ETSI 32QAM EN300113 V2.2.1 Test Method)	

For North American FCC and IC applications please refer to the Xeta4-FCC Series Data Sheet.

Data Transmission

Error Detection	-	Up to 32-bit CRC, Retransmit on Error	Data Encryption ¹	-	AES128 / AES 256
Data Interfaces ¹	-	2 x 10/100 Mbps Ethernet 2 x RS232/422/485	Data Connector ¹	-	4 x RJ45
Serial Interface Speed ¹	-	up to 230.4 kbps	¹ Only applies to fully enclosed products; does not apply to the Xeta4m-T RF Module		

Power / Physical

Operating Voltage	-	12 – 32 VDC with reverse polarity protection to 32 VDC			
Power Consumption (mA) @ 12VDC (Avg)					
• Xeta4-EL (1W/8W)	-	Transmit: 1200 / 2600 mA	Receive: 300 mA	Idle: 400 mA	
• Xeta4x4-EL (1W/8W)	-	Transmit: 611 / 1145 mA	Receive: 380 / 1108 mA	Idle: 215 / 387 mA	
RF Connector	-	Enclosed: TNC	Module: MMCX		
Dimensions (L x W x H)	-	Enclosed: 6.625 " x 3.45 " x 1.835 " / 16.83 cm x 8.76 cm x 4.66 cm Module: 2.0 " x 2.0 " x 0.37 " / 5.1 cm x 5.1 cm x 0.94 cm			
Weight	-	Xeta4-EL 1.54 lbs / 0.70 kg, Xeta4x4-EL 1.61 lbs / 0.73 kg, Xeta4m-T 0.06 lbs / 30 grams			

Environmental

Operating Temp Range	-	-40°C to +75°C. Contact XetaWave for lower temperature operation.
Humidity	-	95% operating humidity @ 40°C non-condensing.
UL Class 1 Div 2		 approved

Xeta4 Series

Xeta4-EL

- Single RF Module
- Dual Band; 406 – 430 / 450 – 470 MHz or Single Band 410 – 470 MHz
- 9 kbps – 44 kbps Data Rates with 8 W Max RF Xmit Power
- Linux Operating System
- HTTP/HTTPS
- VLANs
- IP Routing
- 2 x 10/100 Mbps Ethernet Ports
- 2 x RS232/422/485 Serial Ports
- TCP Terminal Server, TCP Terminal Client, UDP Terminal and Modbus RTU Server capabilities
- IO support for DI1 and External Trigger input for MMS
- Management; Configuration Files, Diagnostics and SNMP

Dimensions (L x W x H): 6.625 " x 3.45 " x 1.835 " / 16.83 cm x 8.76 cm x 4.66 cm
Weight 1.54 lbs / 700 grams

Xeta4x4-EL

- Dual RF Module – can be installed as a Repeater or dual-AP
- Dual Band; 406 – 430 / 450 – 470 MHz or Single Band 410 – 470 MHz
- Frequency Diversity – Second RF Module can be Xeta4, 9, 24 etc.
- 9 kbps – 44 kbps Data Rates with 8 W Max RF Xmit Power
- Linux Operating System
- HTTP/HTTPS
- VLANs
- IP Routing
- Back to Back Repeater Capabilities
- 2 x 10/100 Mbps Ethernet Ports
- 2 x RS232/422/485 Serial Ports
- TCP Terminal Server, TCP Terminal Client, UDP Terminal and Modbus RTU Server capabilities
- IO support for DI1 and External Trigger input for MMS
- Management; Configuration Files, Diagnostics and SNMP

Dimensions (L x W x H): 6.625 " x 3.45 " x 1.835 " / 16.83 cm x 8.76 cm x 4.66 cm
Weight 1.61 lbs / 730 grams

Xeta4m-T

- OEM RF Module only
- Dual Band; 406 – 430 / 450 – 470 MHz or Single Band 410 – 470 MHz
- 12 VDC \pm 0.5 V
- CMOS-level (3.3 voH) RS-232-type interface
- Transmit Current <1.1 A @ 10 VDC for 1 W RF
- Transmit Current <2.7 A @ 10 VDC for 8 W RF
- Receive Current <140 mA @ 12 VDC (Dave has 160 on redline version)
- Idle Current <90 mA @ 12 VDC (Dave has 100 on his redline version)
- Sleep Current <30 mA @ 12 VDC
- Serial Interface Speed 921 kbps (max)
- 24-pin Samtec MTMM-112-05-L-D-159 power/data connector
- MMCX RF connector

Dimensions (L x W x H) 2.0 " x 2.0 " x 0.37 " / 5.1 cm x 5.1 cm x 0.94 cm
Weight 0.06 lbs / 30 grams
